XRCREATOR

THE FIRST AUTHORING SYSTEM
FOR AUGMENTED AND VIRTUAL LEARNING

WITHOUT SMART IOT TRAININGS

TIME-CONSUMING AND COSTLY

Professional coaches can represent a significant investment, depending on their expertise and experience. Likewise, conventional trainings require the coordination of schedules and locations, which can lead to limitations in temporal and spatial flexibility.

NO REAL-TIME ASSESSMENT

With conventional methods of work monitoring, the problem arises that the executed work steps cannot be verified in real-time. This results in errors being identified and rectified only after a certain delay. This can lead to inefficient workflows.

SMART **IOT** TRAININGS

CONNECT & LEARN: INNOVATIVE TRAININGS

By using our smart IoT trainings we create a connection between the real and virtual worlds for you and develop trainings directly linked to the training object.

- **Control and instant feedback:** Monitoring and feedback of work steps in real-time
- **Continuous optimization:** Instantly identify possible sources of errors and perfect your work steps
- **Examination mode:** For ongoing review of your workflows and to hide content

WITHOUT AR KNOWLEDGE DATABASE

In a world that is rapidly changing in terms of technology, augmented reality has established itself as a key instrument for numerous applications. But what does our daily life look like if we were to forget this advanced technology?

- **Limited accessibility:** Training materials are often in cumbersome paper form and lack direct reference to the real object.

- **Elaborate creation:** Training materials require a lot of time to create and must be constantly updated.

- **Uncertain & expensive:** If something goes wrong during training, the consequences can be costly. In addition, dangerous situations and the effects of actions are difficult to train in a safe environment.

AR KOWLEDGE DATA BASE

YOUR INFORMATION COMPASS
– – –

The knowledge database provides learners with answers to their questions during training. Whether it's basic knowledge and onboarding, tips and tricks, or assistance with problems and difficult questions, everything is unified on one platform.

YOUR KNOWLEDGE COLLECTION
– – –

Specialized knowledge can be transformed into innovative XR content of the next generation without the need of programming or design knowledge. All your knowledge always and everywhere availble – for your ultimate learning success and a highly immersive learning experience.

WITHOUT **VR** TRAINING ENVIRONMENT

LESS OPPORTUNITIES

In the world of modern learning, conventional training methods that do not incorporate virtual reality face several challenges:

- **Limited flexibility:** Trainings are bound to fixed times and locations
- **Lack of interactivity:** Learners are often only passive participants
- **Restricted customization:** The needs and learning styles of trainees can hardly be accommodated

VR TRAINING ENVIRONMENT

LEARNING IN ANOTHER DIMENSION

With the XR Creator, you can create interactive scenarios directly in your VR headset without programming knowledge. This way, learners are not just spectators but actively participate in the training.

- **Individuality:** Creation of unique learning environments
- **Diversity:** Interactive learning opportunities to increase efficiency
- **Consequence-free error management:** No real consequences for making mistakes

YOUR IMMERSIVE LEARNING JOURNEY

Experience the future of learning with XR Creator, an augmented and virtual reality authoring tool
to create trainings and learning experiences in an instant, without any programming knowledge.
Our modular system helps you to tailor content to your specific needs and achieve lasting learning success:

Innovation: Comprehensive solution for all XR applications
Flexibility: Perfectly tailored and continuously expandable to real requirements
Knowledge database: Knowledge available anytime, anywhere

CUSTOMIZED SOLUTIONS

Are you dreaming of a tailored XR learning environment for your company? Regardless of your use case,
we put our focus on your specific needs and goals to realize a custom XR solution.

CONCEPTUALIZATION & XR KNOWLEDGE

Our experts rely on comprehensive conceptualization, based not only on technical expertise but also on profound XR knowledge.

TAILORED FEATURES

Do you need a feature crucial for your learning success? We handle the customization for you within short development cycles.

SPECIALIZED CONTENT & TRAINING DEVELOPMENT

Our specialized content and training development encompass 3D design, gamification of XR content, integration of embedded systems, and the use of Artificial Intelligence (AI).

VISION & ECHO

– – – – – – – – – – – – –

Find out first-hand how the XR Creator has changed the way we learn and teach through the voices of our customers and product owner.

"XR will be an integral part of our daily lives in the future. With our XR Creator, you can embrace the future today."

**Michael Demel,
XR Product Owner**

"In the production and packaging of highly sensitive products, it is important to continuously keep the error rate under control. To seize the opportunity to improve ourselves daily, we use the XR Creator, with the knowledge database adapted to our needs. Learning On Site pure this is what Industrial Learning 4.0 looks like to me."
**Dipl. Ing. Roland Fabris,
CEO Takeda Austria GmbH**
